<b>Description</b>			
<p>I'm sure I posted about this before and added a sample. The problem of the sound cutting is very obvious in the 4.1.208 build. I've tested a lot of the files and if there is supposed to be a constant noise all you hear is the sound cutting on and off. It's terrible watching music concerts as the sound just sounds choppy.</p> <p>I've tested audio files in showtime and they play fine. So it is a video playback problem. I haven't attached a file as all the video files do the same. I can however attach a video file of what Showtime is doing if need be.</p> <p>Thanks.</p>

Update: video clip added to show problem.

I've also noticed that the video slightly pauses when the sound cuts. So when a camera pans across it stutters.

- Status changed from New to Need feedback

Can you please retest with the 4.1.244 build?

The audio pipeline has been completely rewritten and I've found some movies where I also had problems with clicks and pops and those movies sounds OK to me now after that rewrite.

With the new build the playback is great! Well done and thank you for sorting the problem. All your work is very much appreciated.

- Status changed from Need feedback to Fixed

Ok, setting as fixed then

**#6 - 11/25/2012 10:24 PM - Girish Patel**

The problem is back again in version 4.1.259.
