| Description | | | |
| <p>I was trying to have subtitles with a german film I was watching. Everytime I enabled the .srt file it crashed back to XMB. It did exactly the same thing when the subtitles we're 'auto enabled'. I thought this was strange as other films work perfectly. So I looked for anything abnormal in the .srt file. After some experimenting, I found that it was these symbols causing the crash '< and > (less than and more than signs)'.</p> | | | |
