Target version:			
Description			
<p>Hi andoma,</p> <p>I'm building a plugin to fetch subtitles from a website, but the download subtitle is a URL that requires to send a Cookie: header with the user session.</p> <p>Could you have to possibility to send custom http headers in req.addSubtitle?</p> <p>An example is this: http://www.legendasdivx.com/modules.php?name=Downloads&#38;d_op=getit&#38;lid=182454</p> <p>You can only downloaed the zip/rar if you are logged in (with a cookie)</p> <p>Thanks andreas</p>

Is this still valid?

Since there is a LegendasDivX plugin in the repo?

#2 - 02/19/2013 07:40 PM - andreas sebes

Hi andreas,

Yes, still valid. Is in the repo for tests only.

#3 - 02/19/2013 08:06 PM - Andreas Smas

Ah OK, I see.

Showtime should deal with cookies automatically in its HTTP client without the plugins having to worry about them at all.

Please try that and if it does not work enable HTTP debug in settings:dev and attach the debug log.

#4 - 02/20/2013 12:20 AM - andreas sebes

The problem is that i need to send a custom cookie.

#5 - 04/30/2013 10:24 PM - Andreas Smas

Sorry for forgetting about this.

Perhaps `plugin.addHTTPOAuth()` will solve your issue?

See the [\[\[JSAPI_plugin\]\]](#) wiki page.

Is the problem still alive?

#7 - 02/20/2014 01:19 PM - Leonid Protasov

- *Status changed from Need feedback to Fixed*

- *% Done changed from 0 to 100*

`httpReq` does the job.
