Description

when i use the delete option on a cifs share, it works only once in per folder.

for example... i have got a folder with 3 subfolders and i delete one of the subfolders, it works fine. then i try to delete a second subfolder, but the square button popup menu will not appear anymore - it just flashes quickly and goes away instantly. cant select delete or other options.

when i leave the folder and re-enter, it works again, but will only work for 1 delete operation and the same problem appears again.

using windows cifs shares.
