

Movian - Bug #2179

ST won't restore submenu of page menu in playback (regression) (all platforms)

Category:	User interface	Estimated time:	0.00 hour
Target version:	4.8	Platform:	Linux
Found in version:	4.7.22		
Description			
Play any video. Press F1 - page menu appears. Go into submenu (Settings->Audio). Adjust something and hide the menu by F1. If you press F1 again - ST brings up page menu instead of submenu. Dunno if that is really regression or that is by design but user complained it worked before: http://psx-scene.com/forums/content/showtime-v4-6-4-latest-stable-build-4416/#comments_start

Yeah I think it's a regression. 4.4 did always have the item menu loaded in the view hierarchy. But 4.6 load it on demand
