Description			
I do:			
<pre>root@ubuntu:~/showtime# ./build.linux/showtime -d --disable-upnp -p ../showtime-plugins/wrongpluginname</pre>			
In the log I see:			
<pre>plugins [ERROR]: Unable to load development plugin fa_normalize() failed</pre>			
I suppose it should be like:			
<pre>plugins [ERROR]: Unable to load development plugin 'wrongpluginname' failed</pre>
