| <p>Whenever I play 3D Movies in Showtime I can't view subtitles properly. The subs are presented correctly in the beginning. But as soon as I activate the 3D mode in television the subs are mixed with the movie and then is unreadable. This also happens with all the user interface and the menus.</p> |           |                        |                   |
