

Movian - Bug #2512

canonicalUrl supplied via videoparams wont work in duktape mode

01/23/2015 06:12 AM - Leonid Protasov

Status:	Fixed	Start date:	01/23/2015
Priority:	High	Due date:	
Assignee:	Andreas Smas	% Done:	100%
Category:	Ecmascript & Duktape	Estimated time:	0.00 hour
Target version:	4.10		
Found in version:	4.9.93	Platform:	Linux
Description			
Try baskino plugin for example. Play something and you will see that pos is not shown at the item duration. Works properly on js.

- Status changed from New to Need feedback

I browse

```
baskino:index:http%3A/baskino.com/films/boeviki/10739-dzhon-uik.html
```

The first item addes has URL

```
"baskino:moonwalk:http%3A/moonwalk.cc/video/fb9a7072a9bc7d61/iframe:%u0414%u0436%u043E%u043D%20%u0423%u0438%u043A%20%7C%20John%20Wick"
```

So no canonicalUrl present

But when playing, it plays:

```
vp [DEBUG]: Playing 'videoparams:{"title":"Джон Уик | John Wick","imdbid":"tt2911666","sources":[{"url":"hls:http://moonwalk.cc/video/57bb9c3534e7aa77/index.m3u8"}]',' primary
```

So the metadata gets bound to:

```
hls:http://moonwalk.cc/video/57bb9c3534e7aa77/index.m3u8
```

Thus, there is a mismatch for the kvstore..

As can be seen when turning on kvstore debug:

Keys are read from

```
kvstore [DEBUG]: GET DB
url=baskino:indexURL:http%3A/baskino.com/actors/%25CA%25E8%25E0%25ED%25F3+%25D0%25E8%25E2%25E7/ key=restartposition
domain=1 value=UNSET
```

after exiting video keys are written to:

```
kvstore [DEBUG]: SET DB url=hls:http://moonwalk.cc/video/57bb9c3534e7aa77/index.m3u8 key=restartposition domain=1 value=216734
rc=0
```

I think this is a bug in the plugin somehow.

#2 - 01/23/2015 08:17 PM - Leonid Protasov

I'm sorry, that's true the bug is in plugin. But if you try multifile videos in liveleak plugin - the bug is there.

Try:

```
liveleak:play:http%3A/www.liveleak.com/view%3Fi%3D5ee_1421732802:3%20Ton%20Power%20Hammer%20-%20Would%20You%20Work
%20Here%3F
```
