Description			
Is there any chance to add this site (group of programs) to some plugin or make another plugin or any other way to watch on PS3? http://www.tivi.ba/aplikacije There are apps for iOS, android and some smart tvs. So any chance to watch this on showtime or that someone built new plugin? Thanks!!!!

I believe it is paid to watch...

It is however available on Samsung and LG TVs, so if you have one, you could sniff the communication between TV and tivi.ba server.

Basing on such data we could create a plugin. (I do not own Samsung nor LG TV)

It's free to watch. And I don't have Samsung or LG tv, but this works from PC in my country. Can this be helpful for making plugin?

EDIT: Also works fine from iPhone.

If you could make plugin for this it would be even better <https://www.bhtelecom.ba/webtv.html#>
It is paid to watch. So I hope you could do that. Thank you!!!
