

Movian - Feature #2810

Smarter coverart/icon selection for video files

10/19/2015 04:27 AM - Aben Escalante

Status:	New	Start date:	10/19/2015
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Metadata	Estimated time:	0.00 hour
Target version:	5.2		

Description

I like to save my jpeg movies covers with the actual video, so so I can turn off metadata, and it used to display the movie with its cover as if metadata was on, I doesn't do it after 4.10 I also tested on dlna and it does show the cover but as a diferent document.

History

#1 - 12/04/2015 07:58 PM - Andreas Smas

Just a comment here that for DLNA it's the DLNA server that sets the cover-art/image so Movian has nothing to do with it there.

#2 - 12/04/2015 08:00 PM - Andreas Smas

- Subject changed from movies with JPEG to Smarter coverart/icon selection for video files
- Target version set to 5.0

- Use embedded icon in MKV-files
- Check for image-name with same stem as movie file.

#3 - 12/04/2015 08:15 PM - Andreas Smas

- Tracker changed from Bug to Feature

#4 - 12/08/2015 09:22 AM - Andreas Smas

- Target version changed from 5.0 to 5.2

#5 - 12/22/2015 09:35 AM - Andreas Smas

- Category set to Metadata

#6 - 02/15/2016 07:00 PM - Aben Escalante

I've been doing some metadata tests and wanted to let you know that embedded cover art on mp4 is not displaying.
