Description

It'd be better if when scroller is onscreen - right press selects it and second right press opens page/item menu.

ui: Add navigation help when pressing left in directory views

Still a bit rough in the edges but worth testing

You have left key on left side free (opposite to hamburger).
It can bring vertical bar. One icon width size. It can have self describing icons with return to previous page, home, end, pgup, pgdn and maybe info
button at the center. That button can be either sysinfo or item menu...
