

Movian - Bug #2998

node.textContent will not output contents of its children

02/07/2016 10:41 PM - Wain .

Status:	Fixed	Start date:	02/07/2016
Priority:	Normal	Due date:	
Assignee:	Andreas Smas	% Done:	100%
Category:	API	Estimated time:	0.00 hour
Target version:		Platform:	Linux
Found in version:	4.10.37.g41bb3		
Description			
<p>I don't really know whether this is a Movian or Gumbo issue, so I'll just leave it here.</p> <p>According to W3 DOM textContent property specification: "This attribute returns the text content of this node and its descendants", and it really does in each and every browser.</p> <p>However, in Movian this property returns only the element's text nodes, and doesn't include text nodes of its descendants.</p> <p>Example:</p> <pre>FooBar</pre> <p>node.textContent should read: FooBar</p> <p>In Movian that'll be only Foo</p> <p>Easy to reproduce with the following snippet:</p> <pre>var test = "<div id='test'>FooBar</div>", parsed = html.parse(test); showtime.print(parsed.root.getElementById('test').textContent); //Foo</pre>

ecmascript: Make element.textContent behave as it should

Fixes #2998

History

#1 - 02/07/2016 10:51 PM - Wain .

I have updated Movian to the latest build (4.99.704.g872d4), still this bug is present. It's quite hard to use new DOM parser because of this issue.
