#### Description

For example movie is playing and I open the webui and type:

<http://foobar.com/subtitle.srt>

It starts where the video is.

#### History

##### #1 - 02/02/2017 01:26 AM - Rob Koni

- File logfile.txt added

It already probes it as SRT however it does not appends it to the current playing video...

##### #2 - 02/02/2017 01:28 AM - Rob Koni

It says can't handle content type 2. Video plays however fine in the background:

##### #3 - 02/02/2017 01:42 AM - Rob Koni

Even on an alternative url an SRT does not open:

[http://torrents.bityouth.com/downloads/127\\_hours\\_2010\\_hd\\_720p.srt](http://torrents.bityouth.com/downloads/127_hours_2010_hd_720p.srt)

##### #4 - 01/03/2018 06:09 PM - Rob Koni

This also accounts for videos with or without .vtt extension.

Or SSA, SUB, VOBSUB or else.

##### #5 - 01/30/2018 04:38 PM - Leonid Protasov

- Subject changed from Opening of subtitle files from webui to Add ability to add subtitle to currently playing movie via webui

- Target version set to 5.2
