<b>Target version:</b>			

#### Description

Since a lot of people watching fullHD or 4K movies usually have a 5.1 sound system (or more, or similar like soundbars), a lot of TV producers implement audio passthrough feature that lets audio systems handle the audio track.

Personally I have an ATMOS soundbar and I feel the difference while playing a movie with built-in Sony TV app and Movian.

So I'm requesting this feature that can improve an already excellent app.

Great work Andreas!

- Status changed from New to Need feedback

What platform do you use Movian on?

##### #2 - 01/08/2018 03:56 AM - Leonid Protasov

- Status changed from Need feedback to Fixed

- % Done changed from 0 to 100

No feedback so I'm closing this.

Leonid this is fixed in the modded version of Movian for Android by Dean. It has Audio passthrough

<https://4pda.ru/forum/index.php?showtopic=669064&#38;st=2940#entry72593742>

(you need an account to download the apk files, generate that via the official 4PDA Android app)

- Added pass-through mode for Dolby Digital (AC3) and Dolby Digital+ (EAC3)
- Added pass-through mode for DTS and DTS-HD Master Audio
- Added option in "Audio settings" "Transcode to EAC3 when possible"
- Added transcoding of unsupported audio codecs (AAC/MP2/MP3) to 5.1 DD/AC3 640 kbps and (DTS/DTS-HD/TRUE-HD) to 5.1 DD+/EAC3 768 kbps (if above option is enabled)
