

Movian - Feature #3315

Support for Youtube time jump

07/28/2017 01:02 AM - Rob Koni

Status:	New	Start date:	07/28/2017
Priority:	Normal	Due date:	
Assignee:	Andreas Smas	% Done:	0%
Category:	Plugins	Estimated time:	0.00 hour
Target version:			

Description

For example:

<https://youtu.be/P0pWhFngvUI?t=1929>

t=1929 jumps directly to 32 mins 9 seconds of the video

If that is added in the search bar or via webui it should go to that position.

History

I don't know if there's any way to start playback at a specific time using the API. (it might mess with the resume playback feature)
I would also like to see &pid= from playlist URLs to both open the playlist, and start playback from that video.

There are several API examples but unsure which JS parser Andreas uses for Youtube
