- Subject changed from *Different sized Icons become cluttered in grid mode to Item's icons of different size force others ones to look incorrect (grid mode)*

Looks like when other icon in the row won't/haven't finish to load the row hight won't resize to already added content.
Screenshot attached.

#4 - 02/08/2018 07:58 AM - Leonid Protasov

- Subject changed from *Item's icons of different size force the other ones to look incorrect (grid mode) to In grid mode the row doesn't resize untill all icons in the row are loaded*

Icons may never load so it's better to resize the raw on any icon arrival or on timer if it was resized less times than the number of icons in it.
