

Movian - Feature #3381

Enable DVD playback on Android

03/21/2018 12:43 PM - Dean Kasabow

Status:	New	Start date:	03/21/2018
Priority:	Normal	Due date:	
Assignee:	Andreas Smas	% Done:	0%
Category:	DVD	Estimated time:	0.00 hour
Target version:			
Description			
Can you enable the DVD playback feature for Android?			
I know it makes sense only for DVD in ISO/Folder but still it works fine.			
I just tested it on my TV/MiBox/Lenovo and now with MPEG2 hardware acceleration it looks perfect.

Dean, you might need to have the <https://play.google.com/store/apps/details?id=jp.co.medialogic.usbmounter>

To mount the actual disc. However, Movian does not have yet the "open with" that this software requires. It does play dvd's mounted via USB on other playback software already. You have to copy the subtitles separately for now. I hope Movian will support this too.

You probably misunderstood me. I compiled movian with DVD support and it works fine on Android. My request was to enable it in the official release.

If you can upstream the changes in a pull request to comply with GPL, Andreas can implement them.
