<b>Description</b>			
<p>I tried with the 401 version of showtime playing dvd iso files and thats working fine. I play it from my Synology nas. The only problem i occure is that the controller isn't working in the dvd menu. So it's not possible to start the video or select other things in the dvd menu. Is there some way to get the ps3 controller to work in the dvd menu?</p>

I don't know why/how but the controller is working in the dvd menu. This can be closed.
