

## Movian - Bug #888

### Subtitles wont be detected if a point is used in the name

02/27/2012 07:28 PM - Trokal Smith

<b>Status:</b>	Fixed	<b>Start date:</b>	02/27/2012

<b>Target version:</b>	3.6		
<b>Found in version:</b>	3.4	<b>Platform:</b>	PS3
<b>Description</b>			
<p>Hello,</p> <p>I would like to report a bug about subtitles. Showtime does not read or even detect if a subtitle name contains a point. For example: The Movie Of The Year.english.srt The Movie Of The Year.frensh.srt The Movie Of The Year.italian.srt The Movie Of The Year.russian.srt</p> <p>This is very useful to have as sometimes our movie contains more then one subtitle file. thanks for looking into this!</p>

Make the SRT scanner pickup all SRT files that stems with the video filename

Fixes #888

#### History

##### #1 - 02/28/2012 11:07 AM - Jérôme S.

Maybe I'm wrong, but I think showtime can only shows subtitle with the same name of the movie.

Like movie.mp4 / subtitle.srt

If you would like more than one subtitle, you should consider using mkv container. With mkvmerge gui you can create an mkv file with multiple subtitles, audio, event video.

##### #2 - 03/01/2012 08:49 PM - Trokal Smith

I dont think so, but the problem is that it doesnt not detect subtitles having the following format for example (with "dot" in the name):

The Movie Of The Year.english.srt

The Movie Of The Year.frensh.srt

The Movie Of The Year.italian.srt

The Movie Of The Year.russian.srt

**#3 - 03/02/2012 03:14 PM - Jérôme S.**

Does your movie named "The Movie Of The Year.english.avi/mp4/mkv/ogm/..." ?

**#4 - 03/04/2012 10:46 PM - Trokal Smith**

my movie is named:

The Movie Of The Year.avi

**#5 - 03/05/2012 09:47 AM - Jérôme S.**

So your subtitle must be named:

The Movie Of The Year.srt

Maybe I'm wrong, I quote what I said days ago above: "I think showtime can only shows subtitle with the same name of the movie."

But if you are to stubborn to try...

**#6 - 03/08/2012 02:07 PM - Trokal Smith**

lol!

I'm telling you it DOES work when you name it with the same name.

but open your eyes and see that if you have subtitles of dif languages, and are marked like this:

*The Movie Of The Year.english.srt*

*The Movie Of The Year.frensh.srt*

*The Movie Of The Year.italian.srt*

*The Movie Of The Year.russian.srt*

they are not read!

**#7 - 03/08/2012 08:09 PM - Jérôme S.**

Are you playing with me or do you not want to understand ?

movie.avi with movie.srt should work, it works for you to, good.

movie.avi with movie.english.srt should not work, (I think, from the beginning) because your file is movie, and your sub file is movie.english, it does not work for you to, good. So where is the issue ?

If you want multiple subtitle from different languages, you should consider using mkv format, with mkvmerge it's easy.

After reading this, if you don't understand what I'm saying, I could do nothing more for you.

**#8 - 03/09/2012 11:25 AM - Trokal Smith**

I do understand!

not work for you to, good. So where is the issue ?

I suggest a feature to make it work like VLC on windows lol

#9 - 03/09/2012 11:37 AM - Jérôme S.

Ok, so ask for a feature, don't report it as a bug, and don't argue as if.

#10 - 04/01/2012 02:20 PM - Andreas Smas

- Category set to Subtitles
- Status changed from New to Accepted
- Assignee set to Andreas Smas
- Target version set to 3.6

but open your eyes and see that if you have subtitles of dif languages, and are marked like this:  
The Movie Of The Year.english.srt  
The Movie Of The Year.frensh.srt  
The Movie Of The Year.italian.srt  
The Movie Of The Year.russian.srt  
  
they are not read!
```

If you use iso language code as language it will pick them up and select the one that is your preferred language (as configured in settings -> languages)

so call them

```
movie.eng.srt  
movie.rus.srt
```

etc

For this to work you need also to enable the 'Include all subtitle files from movie directory' setting in the subtitles configuration page.

#11 - 04/01/2012 02:20 PM - Andreas Smas

.. that said, it could probably work a bit better.
